Special Material

Simon M7 Gem

Utilize the transparency of **Glass**. The transparency of AG glass lends an understated elegance, allowing them to complement a range of design aesthetics, from contemporary to industrial.

70% high intensity haze effect

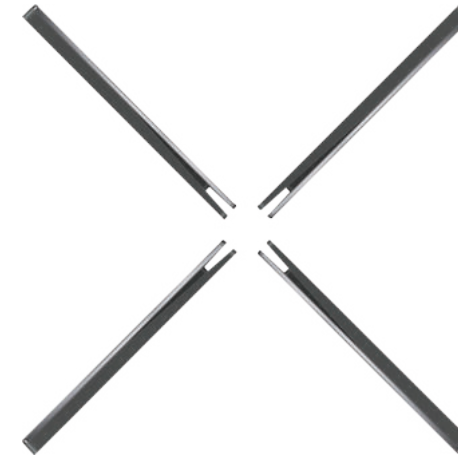

Anti-glare Glass Classy Matte Surface

7H high strength etched AG glass is meticulously produced through an automated seamless process.

70% high-intensity haze effect is achieved while preserving the transparency of the glass.

Ultra Slim Visual

Beyond Imagination More Than Just Slim

The entire series reduces the panel thickness down to **7.5mm** and to **5.1mm** when switched on. Ultra slim profile aims to contribute to a minimalist design and reducing visual clutter. Featuring a simple, clean and sleek finish to blend in seamlessly with the surrounding environment.

Full Flat Appearance

When switch is off, the rocker is parallel to the base plate, achieving **0° angle**. Switches flush surface that blends harmoniously with any interior décor, boasting an uninterrupted visual appeal

Perfect Square

Frameless panel design with perfect square edges. Cleverly balances the visual and function experience. **Slim and Elegant**

Simon M7 Air

Matte Finishing - the brand new matte finishing of SIMON M7 AIR adds a subtle elegance to the design. It exudes a modern and sophisticated vibe, making it a stylish addition to the wall. SIMON AIR comes with 2 color finishing, white and platinum grey. These colors have a timeless quality that transcends trends and fads.

Simon M7 Metal

Metal - a pinnacle in the fusion of functionality and aesthetic appeal. These switches not only provide robust performance and durability but also add a touch of sophistication. The sleek and polished surfaces of brushed aluminum exude elegance and professionalism, making them a preferred choice in premium architectural designs.

Aviation-Grade Alumium

Anodic oxidation process is used to enhance the **corrosion resistance, durability, and aesthetic appearance of metal surfaces**. Additionally, the process can produce a uniform, satin finish, enhancing the visual appeal of the metal surface.
